

SHOWCASE – vrbn solutions

'King Sakir'

CLIENT

Subcontracted via Esri Turkey

'King Sakir' is one of the most famous Middle Eastern kids cartoon series. For this full-length movie that was shown in the cinemas, we were tasked to help with the creation of a full 3D representation of a large portion of Istanbul in Turkey. The base for the city was GIS data, which we then creatively interpreted.

SERVICES PROVIDED

- Development of procedural modeling rules (CGA, CityEngine)
- Procedural modeling of cartoon city
- 2D GIS data cleanup (data of Istanbul, Turkey)
- Asset cleanup and layout
- Exporter to 3D data (Maya with RedShift3D)
